Harvard InterLock® ONE Universal Adhesive

Really universal: suitable for all tooth conditioning techniques:

as "Self Etch" adhesive, as "Total Etch" adhesive (which etching step), wet or dry

- Only one thin layer necessary
- High & reproducible bond strength to enamel and dentine even under long term stress
- Effective marginal seal for low risk of postoperative sensitivity
- Excellent performance also with self or dual cure composites when light curing is possible, if not see e.g. for adhesive post cementing in the root canal mix additional with Harvard InterLock ONE Self Cure Activator
- Convenient application by bottle (precise dropper)

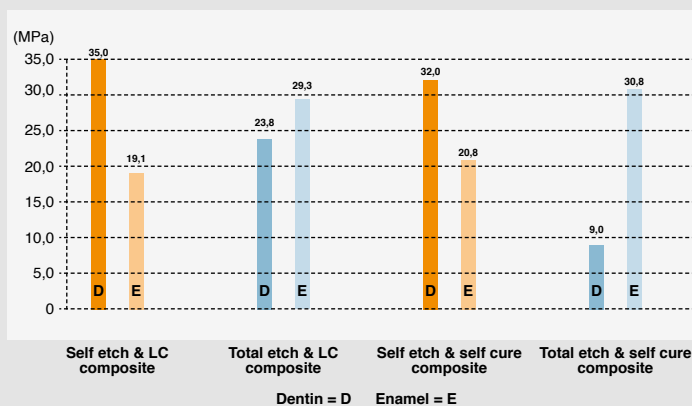

Harvard InterLock® ONE – Universal Performance

Dentin & enamel **after thermocycling**

Etching: Total Etch or self etch

Composite: Light cured – **InterLock ONE**: Light cured

Composite: Self cured – **InterLock ONE**: Light cured

Composite: Self cured – **InterLock ONE** plus **InterLock ONE Self Cure Activator** ★
if light cure is not possible eg. in the root canal.
